# How Can Something **SO DEADLY** **TO HEAD LICE** be So Safe and Gentle to Humans?

---

## What's the Secret to Killing Head Lice?

If you have Head Lice, you really have two major problems:

- 1) The Lice and Eggs (nits) in your hair
- 2) The Lice, Eggs (nits) that are in your Environment!

If you have tried the over-the-counter drugstore brands of pesticides that don't work, you have experienced what farmers already know: ***Insects Become Resistant to Pesticides.***

## So Why Does LiceKiller really Work?

LiceKiller safely gets rid of Head Lice, by using a proprietary blend of natural oils that have documented insecticidal properties. The killing method of the oils happens in a way that is impossible for the bugs to develop resistance.

Yet the ingredient oils in our formula have all been safely used by humans for centuries! They are safe even for babies. They are actually VERY GOOD for your skin and hair!

Access Nutraceuticals' LiceKiller formula was scientifically developed using the professional consulting services of several experts including a Ph.D. in chemistry.

All of our ingredients are of the highest quality and are all natural. Many of the oils we use are exotic and extremely expensive. *(For example, the cost for one of our ingredient oils is nearly \$2,000 per gallon...wholesale!)*

## Our Oil Based LiceKiller Treatment

The oils we use are of the highest quality and purity. Our oil-based formula contains a whopping Eight Percent active ingredient. (Industry Standards are usually about 1 to 2 percent.) So, our products are EXTRA STRENGTH. But at the same time, they are completely safe for you and your children. Plus we don't just rely on one active ingredient oil. We use the Following:

- Neem Oil
- Tea Tree Oil
- Karanja Oil
- Eucalyptus Oil
- Rosemary Oil
- Peppermint Oil
- Lavender Oil

And the active LiceKiller oils are mixed into TWO carrier oils that also help with the treatment: Olive Oil and Coconut Oil.

Olive oil is known for its insect-smothering abilities. Coconut oil is known for its penetrating quality so it carries the killing oils through the exoskeletons of the lice to kill them quickly.

## LiceKiller is SAFE!

LiceKiller contains NO poisons. No Fillers. No preservatives. Nothing Dangerous! Our oil-based LiceKiller treatment contains only the finest, highest quality, most expensive active ingredients and carrier oils that nature can provide and that money can buy!

## **If Someone Could Figure Out and Patent the GLUE that Lice Use to Attach Nits to Hair, They'd Be RICH!**

### **So...How Do You Remove Those Stubborn NITS?**

#### **Our Enzyme-Based LiceKiller Treatment**

Our Organic Enzyme based treatment dissolves the glue that holds the eggs to the hair follicle and dissolves the exoskeleton of the lice, killing them in the process.

Our unique nontoxic blend kills germs, bacteria, odors and Head Lice, eggs (nits) and the nit glue. These all-natural, all organic, biodegradable group of enzymes penetrates, emulsifies and dissolves all sorts of lice, nits/eggs and the germs and bacteria that they carry!

#### **Our Oils Based Repellant Treatment**

Our number one repellant is 'Catnip Oil' which repels and even kills insects according to a study done by the USDA Forest Service.

In research conducted at Iowa State University, catnip oil was 10 times more effective at repelling mosquitoes than the compound 'Deet' (N-diethyl-m-toluamide) a commercial pesticide used in most over-the-counter bug repellents.

Our second repellant is 'Erigeron Oil' produced exclusively from wild growing plants, is the oil of Erigeron Canadensis.

#### **Remember Your Second Problem?**

Not only do you have Lice and Nits in your hair, you've got them in your bedding, your clothes, your furniture, even your car!

To completely win the war against lice, you must treat your environment. And if pesticides don't work on lice in your hair, they don't work on lice in your environment either. So insecticide bombs are not the answer!

#### **Our Environment Kits**

It's very difficult to cleanse your home of all lice and eggs (nits) that are hiding in your bedding, couches and clothing, so we have also developed an outstanding group of Environmental products, in customized kits designed to fit the size of your home.

Our Furniture and Bedding Spray Concentrate will kill lice and nits on any object you spray them on in your home. Our proprietary BugKiller Laundry Concentrate will dissolve and kill the Lice, eggs (nits) and the nit glue that hold the eggs to your clothing, in the wash without the use of hot water.

### **Our One-Two Punch will knock your Lice Out!**

We KNOW you are going through a lot and we want to be there for you. Our part in all this is to produce the very best LiceKiller treatment products for you. We want you to be free of these pests forever!

**We know you have already tried other drug store brands that didn't work. *The last thing you need is another product that doesn't work.*** We know you're frustrated and need help now!

By providing you with the highest quality LiceKiller enzymes and essential oils to combat Lice and their eggs, we are doing our part.

Our two-step lice killer treatment is the one-two punch that will knock your lice problem out for good.
